

Argos OnBoard for Canon

Track and control copying and printing.

sepialine.com/canon

Track printing and copying with Argos for Canon accounting software that works with your Canon multi-function peripherals. With Argos you can authenticate users, track their print and copy activity — including color and duplex details — and run detailed reports. Argos runs on your existing servers, so it's easy to set up whether you have one MFP or thousands — without the need for additional hardware. Add Argos to your MFP, reduce waste, get green, and lower costs.

Embedded software—no hardware, no cables, no mess

As-printed tracking of print, copy, and scan activity

Color, duplex, and paper size detection

Device control lets you decide who accesses which features

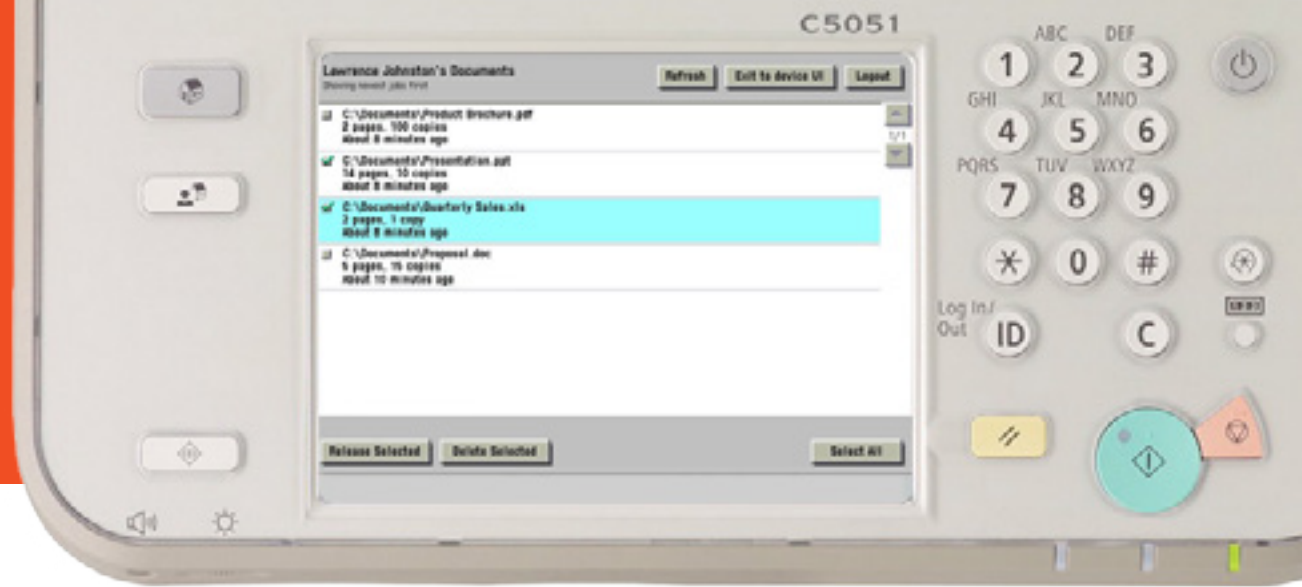

Works with PIN codes, Active Directory, and proximity cards

Web-based installation is quick and easy

Documents cost. Track them.

Argos manages expenses—not just meter counts, but the who, the what, the when and where of every print, copy, scan, fax, and more—so you'll finally get a handle on your document costs, reduce waste, lower costs, and impact your bottom line.

Argos OnBoard for Canon helps you track, analyze, recover, and reduce document expenses. Whether you're a school looking to track student printing, a company wanting to reduce expenses, or a professional firm charging for reimbursable expenses, Argos delivers the tools you need to intelligently manage your documents.

Argos tracks every print, copy, and scan on your Canon MFPs, and records everything to a central database. Professionally designed reports make it easy to see your expenses with clarity.

Pure Software

Argos OnBoard is a MEAP application, so it runs right on your LCD front panel. No terminals. No stands, arms, or mounts. And no spaghetti wiring behind the copier. Nobody likes that. Instead you get clean, simple, intuitive software that's beautifully designed to do its job, then get out of the way. Users stay productive. Management get their statistics. Everybody wins. Installation is a piece of cake, too—no technician required. Just launch your web browser and a few clicks later, you're done.

Secure Release

Eliminate the reams of wasted pages that sit in your paper tray, unclaimed and uncollected until someone finally cleans up. With Argos Secure Release, print jobs are held until users claim them at the MFP. Whether you're protecting sensitive information or reducing waste, Argos Secure Release ensures that documents are only printed on-demand, while the user is at the printer.

Friction-Free Cost Recovery

If clunky popups, intrusive workflow, and unhappy employees are your notion of bill-back software, think again. Argos lets you print first and asks questions later. Everyone stays productive and on-track and, yet, completely accountable for their expenses. With Argos you'll get all the benefits of reimbursable chargeback with none of the pain.
