Networked Deployment

Monitor logs and facial database from a central backend on your network. You can pull reports based on areas and monitor, configure and control your devices from a central PC.

The dashboard provides a comprehensive overview of face scan operations. It features four main statistics cards: Total face scan statistics (22), Employee face scan statistics (0), Visitor face scan statistics (0), and Stranger face scan statistics (22). Below these are three charts: Device statistics (Total number of devices: 1, 1 online, 0 offline), Attendance yesterday (Total attendance: 1), and Today's traffic (Total Pass: 0). The Real time monitoring section displays a grid of face scan images with labels such as 'Stranger' and timestamps.
