

6 Tips To Consider When Moving

Whether your company is downsizing or moving to a bigger office, relocating be overwhelming – but it shouldn't have to slow down your business operations.

START ON THE RIGHT FOOT BY CONSIDERING THE FOLLOWING:

Wiring & Cabling

Assess your new layout and wiring so you can easily set up technology.

Print Workflow

Determine how many printers you need and how they can best support your team.

Conferencing

Ensure audio and video capabilities are effectively installed.

Cloud Migration

Consider a unified communications (UCaaS) platform to enhance flexibility.

Managed IT

Determine if any of your technology is outdated, broken and no longer secure.

Security Setup

Implement remote access cameras and card authentication technology.
